About Us

RoboGrinder is an undergraduate student-led team that brings together students from diverse disciplines to design, build, and compete with a fleet of autonomous and driver-controlled robots in the ARC Robotics Championship.

Since 2016, we've proudly represented Virginia Tech both in and out of the arena. With our sponsors' support, members apply classroom knowledge to real-world engineering challenges while developing skills for their future careers.

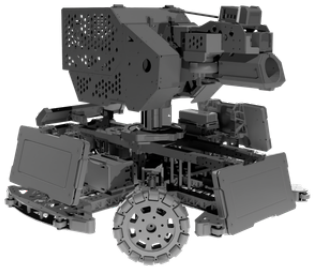

70+	#2	5	10
Active members	Average finish	Subteams	Years of competition

What We Build

We develop custom fully autonomous and driver-controlled combat robots integrating mechanical, electrical, embedded, and software systems.

Autonomous Sentry

Hero Robot

Infantry Robot

Our Track Record

2ND in 3v3
ARC Robotics Championship Season One Lafayette, IN 2026

CHAMPIONS in 3v3
RoboMaster University League North America San Diego, CA 2025

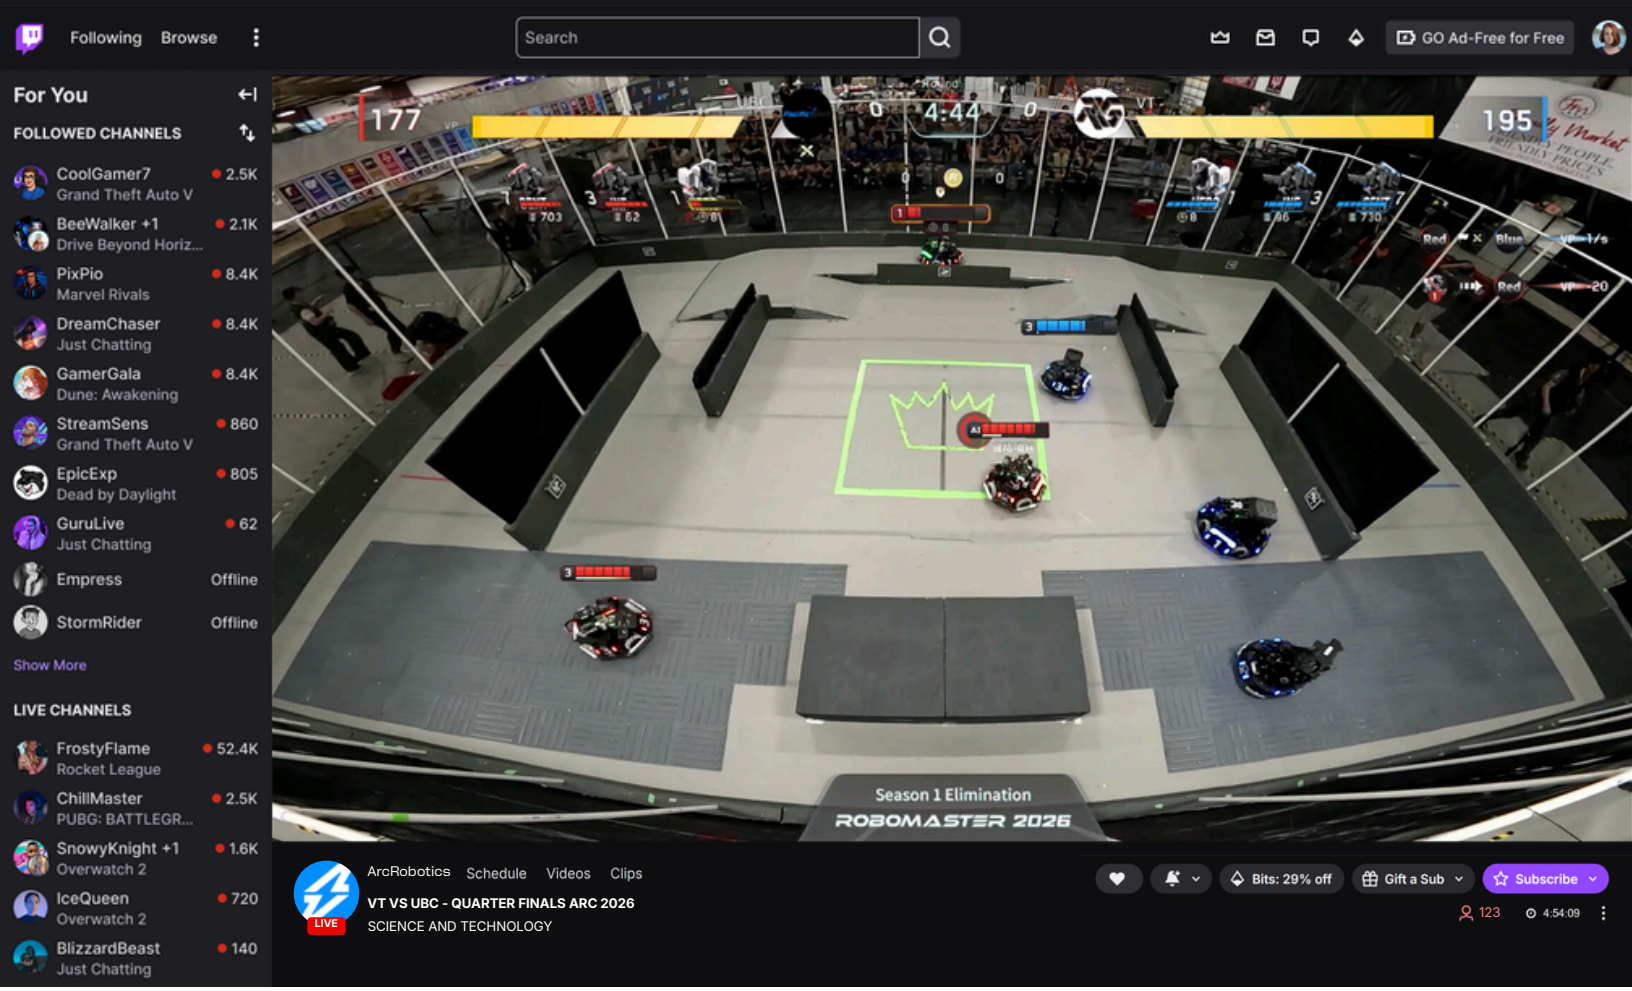

2ND in 3v3
RoboMaster University League North America Boulder, CO 2024

4TH in 3v3, 4TH in 1v1
RoboMaster University League North America Seattle, WA 2023

1ST Prize in ICRA AI Challenge, 2ND in 1v1
RoboMaster University League North America College St, TX 2022

2ND in 3v3
RoboMaster University League North America College St, TX 2021

Engineering Meets Esports

The **ARC Robotics Championship** (formerly RoboMaster North America) brings esports into the real world, combining fast-paced FPS and MOBA-style gameplay with competitive robotics. University teams from the USA, Canada, Japan, Turkey, Italy, Singapore, and beyond compete in intense 1v1 duels and tactical 3v3 battles.

With livestreamed matches and esports-style broadcasts, ARC creates opportunities for international brand exposure. Partners can gain visibility through team apparel, robot branding, social media, and competition coverage, subject to event branding guidelines.

Sponsorship Tiers

	Friend	Bronze	Silver	Gold
Annual Value	$250+	$3,000+	$8,000+	$15,000+

RoboGrinder at Virginia Tech is a 501(c)(3) tax-exempt organization and thus all monetary and some in-kind donations are tax deductible. Values above are solely for monetary donations, in-kind donations will be assigned a tier by the team.

Why RoboGrinder?

- **RECRUITMENT & ENGAGEMENT:** Connect with engineering talent through recruiting, workshops, and lab visits.
- **BRAND & LIVESTREAM EXPOSURE:** Gain visibility through esports-style competitions, robot branding, and social media.
- **PRODUCT SHOWCASE & COLLABORATION:** Showcase products in competition-tested robots and engage students through technical feedback.
